ID
IDENTITY DESIGN
ID - sta per identità.
L'identità per ogni individuo è un elemento fondamentale per riconoscere la personalità, il gusto e lo spirito. La collezione presenta le immagini con soluzioni cromatiche e grafiche variegate. Alcune di queste si adattano a un gusto più moderno con colori decisi, altre fanno riferimento fondamentale ad un immaginario collettivo e una contaminazione stilistica poliedrica. Una delle caratteristiche principali del ID consiste nell'utilizzo di vari basi materici che vanno ad interpretare e coniugare l'immaginesovrapposta. Questa molteplice impostazione stilistica dei soggetti permette di utilizzare le immagini classiche nei luoghi moderni e viceversa. Le immagini ed i colori nel loro insieme ispirano il designer a creare gli ambienti personalizzati.
Ideato e prodotto in Italia
ID stands for identity.
Identity is a fundamental element for recognising the personality, taste, and spirit of every person. ID is a collection of images in a variety of colours and graphical solutions. Some of them adapt to a modern taste by using decisive colours; others refer to our basic, collective imagination with a stylistic mix that has many different facets. One of the main features of the ID collection is its use of different underlying materials that interpret the overlaid image and combine with it. This multiple stylistic approach to the designs makes it possible to use classical images in modern settings, or vice-versa.The overall effect of these images and colours inspires the interior designer to create personalised environments.
Designed and made in Italy
